

# MCM SECURITY ALARM MONITORING

- ✓ **Alarm Monitoring Service,**
- ✓ **24-hours a day, 7 days a week!**
- ✓ **Provides peace of mind and added security**
- ✓ **Monitored Alarms for Home or Business**
- ✓ **Major burglary and crime deterrent!**
- ✓ **Don't be a victim!**

Getting alarm monitoring for your security system is one of the best ways to protect your business or home from a burglary. Having a monitored alarm means that whenever you turn on your security system someone will be standing by watching over your business or home. And the fact is that you are less likely to be burglarised if you have a monitored alarm in your business or home.

MCM Security monitoring service is 24-hours a day, 7-days a week. As long as you arm your security system then our Alarm Receiving Centre will be notified if your alarm system is set off for any reason. Plus your monitoring service comes with 24-hour monitored panic buttons, these panics can be pushed anytime day or night, no matter if your security system is armed or not.

## **Benefits of Alarm Monitoring**

- ✓ Chances of being burglarized greatly reduced
- ✓ Save on your homeowners insurance.
- ✓ Protection for your home and family 24/7 365 days a year.
- ✓ Peace of mind knowing what matters most to you is protected.
- ✓ Security system monitoring just makes sense

MCM Security Alarm monitoring also reduces your chances of being victimised in your own business or home. Arming your business or home security system when you leave your house will greatly reduce the chance of their being someone in your business or home waiting for you when you return.

If you have active monitoring on your security system not only will the siren help scare off intruders but it will also alert our Alarm Receiving Centre to dispatch the proper authorities to check out your home before you walk back in.

Remember, alarm monitoring only works if you use it. Be sure to turn on your security system every time you leave your business or in the home and at night when you go to bed.
