

MCM SOCIAL ALARM MONITORING

Senior members of our community can have peace of mind in the knowledge that they have access to someone 24 hours a day 7 days a week, if they have need of help or assistance. A Medical Alarm Unit can be installed into any residential property.

The system consists of a base unit connected to the telephone line. This unit can be activated via a remote pendant, carried by the user. Once activated, the user can talk directly to one of the Operations Team in our Central Monitoring and Control Centre where listed your Key Holders or the emergency services can be contacted.

Social Alarms are ideal for persons who reside alone and who require the comfort of knowing that there will be someone to talk to immediately should they encounter an emergency situation. The alarm unit is connected to the telephone line and is activated via a remote pendent, which is carried or worn by the user. Once activated, the user talks directly to the Central Monitoring and Control Centre who can alert a nominated key holder or the emergency services.

"Now I feel secure, because I can rely on quick, professional assistance whatever happens"
